                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 20,

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A; Molecule type: protein
A; Residues: 87-106;1017-1029;1037-1049 < HEN>
C; Comment: Prolines at the thint dosition of the tripeptide repeating unit (G-X-Y) are hy
C; Comment: Prolines at the thint dosition of identical chains, linked to each
C; Comment: The type III collagen molecule is a trimer of identical chains, linked to each
C; Superfamily: collagen alpha 1(I) chain #status carboxyl-terminal homology;
C; Keywords: collagen alpha 1(II) chain #status experimental cCAB>
F; 1-1049/Product: collagen alpha 1(III) chain #status experimental cCAB>

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Arch. Biochem. Biophys. 384:37-46(2000).
-!- FUNCTION: Type I collagen is a member of group I collagen
-(fibrillar forming collagen).
-(fibrillar forms of one alpha 2(1) and two alpha 1(1) chains.
-!- SUBUNIT: Trimers of one alpha 2(1) and two alpha 1(1) chains.
-!- PTM: Prolines at the third position of the tripeptide repeating unit (G-X-Y) are hydroxylated in some or all of the chains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            case
